NEWS OF OUR NEIGHBORS

CURWENSVILLE

Charles Moore, who has been on the sick list for a week, is again able to resume his duties at the brick yard.

Timothy Dault was home from Sioux Falls, S. D., Sunday with his parents. He is employed in weighing coal for the P. R. R. Co. at that place.

About twenty-five Boy Scouts, who spent a portion of last week at the Backford camp on the mountain, have nearly all returned home very much pleased with their outing.

The new comm. in on Sunday morning attracted a number of young people to the river to watch the unfolding process who ought to have been in Sunday School.

During the day a light rain storm visited this place but did no damage.

The municipal service held in common council at recess members of the Clearfield O. C. C. P. were held in session Sunday evening at the Clearfield O. C. C. P. There were present: Mayor and council members who were present on the evening were: Mayor, Council members, and members who had been appointed to that duty. The members of the Clearfield O. C. C. An employee of the Clearfield Re-fractory Company was seriously injured at a place Sunday.

A fire broke out at the Clearfield Re-fractory Company Sunday night, but was quickly extinguished.

A few days ago The Progress reported that we had a three page communication relative to the American Legion and its work with the special request to have the same published in the paper usually reserved to the common letter. While we would be pleased to comply with the request, it would be up to the readers to much place to the detriment of crowding out other news items. So far as the communication relative to the American Legion is concerned, we will give it a place.

June 25th to July 1st, 1920, the Clearfield Re-fractory Company will be closed for business. The reason for this is that the company is moving to a new location. The new location is at the corner of the Clearfield Re-fractory Company. The new location is at the corner of the Clearfield Re-fractory Company. Certain-teed Roofing Resists Fire

Certain-teed Roofing is fire retarding and spark proof, consequently your fire risk is greatly reduced when Certain-teed roofs your buildings.

Sparking embers carried by the wind from nearby fires are always a menace to old fashioned, inflammable wood shingle roofs. Certain-teed forms a permanent protection against sparks and embers and all such carriers of fire.

Because of the great risk of general conflagrations in congested districts, and of the lack of safe fire protection in the ordinary and rural districts you should get this Certain-teed protection for your buildings.

In addition to being fire resisting, Certain-teed is a most economical roof. It resists all forms of weather attack—rain, sleet, snow, sun, etc. It is guaranteed by the manufacturer for 5, 10 or 15 years, according to the weight you select.

There is a scarcity of many types of roofing product—you can always get Certain-teed Smooth Surfaced Roofing, the most economical and serviceable roofing to be obtained.

See your dealer at once. He either has Certain-teed or can get it quickly from a nearby Certain-teed warehouse.

WE FURNISH ROOFING & RELATED BUILDING PRODUCTS

WITH THE COUNTY AGENT

Last fall most of the farmers of Clearfield county sold their wheat for \$2.00 per bushel and were glad to find sale for it at that price. The following figures prove that the farmers at least are not profiteering.

The following figures represent the average of forty-four farms in twelve different counties scattered over the entire state. The information was kept accurately throughout the year by the farmers on especially made blanks for that purpose. The records were then forwarded to the College where they were calculated and averaged. They represent cost on eight hundred six and one-half acres ranging from four to forty-four and one-half acres per farm.

In making these calculations a number of definite values for factors entering into the cost were used. Seed wheat was charged at \$2.50 per bushel. Manure \$2.00 per ton, charging only 50 per cent. to wheat. Fertilizer was charged at its actual cost, like-wise lime that was applied. Interest was charged at 5 per cent. on only that part of the land, equipment and buildings that was devoted exclusively to the wheat crop. The depreciation on machinery was allowed at the farmers' own rates which in almost all cases was 10 per cent. Man labor was charged at 30 cents per hour and the horse labor at 15 cents per hour. This makes only \$6.00 per day for man and team and is somewhat under the amount that is usually necessary to pay when hiring. The yield of straw was credited at \$6.00 per ton before the cost per bushel was figured.

The following is a brief summary of the cost of producing an acre of wheat:

Man labor (27.99 hours)	\$8.49
Horse labor (45.39 hours)	6.81
Seed wheat	4.77
Manure (1.57 tons)	1.57
Fertilizer (282.2 pounds)	3.51
Lime (288.7 pounds)	.81
Depreciation of machinery	1.81
Interest in land, building and machinery	8.49
Oil	.08
Binder twine	.65
Coal, oil and gas	.27
Threshing	1.15
Taxes	1.25
Insurance	.27

Total cost per acre \$39.71
Value of straw (1783 lbs.) 5.37

Net cost per acre 34.34
Yield of wheat per acre 19.5 bu
Cost of wheat per bushel \$2.00

The average farm requires an investment of \$40.33 in building and \$20.25 in machinery and equipment for every acre of wheat grown. The average charge per bushel for threshing wheat was 5.7 cents. The average acreage of wheat per farm was 18.8 acres with an average value of \$111.00 per acre.

The following shows brief summary of the distribution of the labor required to grow an acre of wheat.

NUTRITION CLASS THRIVING: TWO GET GOLD STAR

At the Nutrition Class meeting last Thursday, the gold star for the highest gain was won in one group by Mary Bakley and in another by Josephine McLaughlin.

Miss Hurley from the State Dispensary and Mrs. Clyde Slaver assisted with the weighing and recording.

Miss Isabel McGill and Miss Madeline Hughes, from the High School Domestic Science Class, served milk cocoa to the children. The following recipe was used. You will note that it is very weak cocoa, the cocoa being mainly to color and flavor the milk and thus give the children a change from plain milk. No strong cocoa should ever be given to children.

Six Servings. Level Measures.
3 tablespoons cocoa
3 tablespoons sugar
2 cups water
4 cups milk
Pinch of salt.
Mix dry ingredients. Add boiling water and cook until smooth and glossy. Add milk and heat to scalding. Do not boil. Beat with Dover beater to make it frothy before serving.

Sulphur Clears A Pimply Skin

Apply Sulphur as Told When Your Skin Breaks Out

Any breaking out of the skin on face, neck, arms or body is overcome quickest by applying Mentho-Sulphur. The pimples seem to dry right up and go away, declares a noted skin specialist.

Nothing has ever been found to take the place of sulphur as a pimple remover. It is harmless and inexpensive. Just ask any druggist for a small jar of Mentho-Sulphur and use it like cold cream.

ERICKSON-KIRKMAN

On Saturday morning at the Lutheran parsonage, this city, by Rev. C. W. Baker, Mr. Anton E. Erickson of Munson, Pa., and Miss Martha M. Kirkman, of Grassflat, Pa., were united in marriage. Only the immediate families were present. The beautiful and impressive ring service of the Lutheran Church was observed. The happy couple will be at home in their newly furnished home in Philipsburg after July first. Their many friends unite in wishing them a very happy and extended married life.

CAMPED AT PRAIRIE ROCKS

The party that camped at the Prairie Rocks Camp last week saw one large doe and two fawns a day old. They also saw many pheasants and snipes. They caught about four hundred fish and also visited many of the camps and places of interest on the mountain.

The party consisted of Mr. and Mrs. A. E. Carr and two children, of Johnstown; Mr. and Mrs. C. C. Richner and three children, of Cresson; Mr. Herbert Keeney, of Johnstown; Jess Justice of Cresson and Mr. and Mrs. E. P. Carr and four children, of Clearfield.

1b Backachy Or Kidneys Bother

Eat less Meat and take a glass of Salts to flush out kidneys—Drink plenty water

Uric acid in meat excites the kidneys, they become overworked; get sluggish, ache and feel like lumps of lead. The urine becomes cloudy; the bladder is irritated, and you may be obliged to seek relief two or three times during the night. When the kidneys clog you must help them flush off the body's urinous waste or you'll be a real sick person shortly. At first you feel a dull misery in the kidney region you suffer from backache, sick headache, dizziness, stomach gets sour, tongue coated and you feel rheumatic twinges when the weather is bad.

Eat less meat, drink lots of water; also get from any pharmacist four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean clogged kidneys and stimulate them to normal activity, also to neutralize the acids in urine, so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive, cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active. Druggists here say they sell lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.

KEYSTONE

The ICE CREAM THAT EVERYONE LIKES

"If you want to know whether you are destined to be a success or not, you can easily find out. The test is simple and infallible—Are you able to save money? If not, drop out. You will lose. You may think not, but you will lose as sure as fate, for the seed of success is not in you."

James J. Hills, the Great Upbuilder of the Northwest, is credited with the above.

Observation has taught that to become successful a person must first learn how to save, and second, how to invest those savings. All successful men find it advisable to protect themselves and their families by making conservative investments from their earnings.

Do you do this?

Business men, farmers, professional men, merchants, wage earners, women as well as men, should be a part of and should invest carefully and conservatively in, other business other than their own—preferably in home industries.

Penn Public is offering to its customers, either for cash or on a special savings ten monthly payment plan, its 7 per cent. Cumulative Preferred Stock.

This stock represents a safe and well-secured investment in a home enterprise.

In a business which supplies a commodity, vital and essential to the everyday life of you and your neighbors.

It may seem this is an unusual plan for a company to adopt for marketing its securities. That is true. It is done, however, to increase the interest and co-operation of Customers and employees by a distribution of partnership interests here in the community which Penn Public serves.

In these advertisements reference has been made only to the sale of this stock to Customers. A sufficient amount has been reserved, however, to permit each and every employee, whether a Customer or not to subscribe.

We propose to encourage and assist each employee to invest in this stock.

This should at least be convincing proof to others of our honesty of purpose and faith in our statements as to the safety and security of this stock as an investment.

Plastic Amputations.

Dr. G. Bosch Ayres of Buenos Ayres has made a remarkable success in modeling the stump of an amputated thigh by the plastic operation. In the *Semana Medica* (Buenos Ayres) he gives details of the way he remodels the stump so as to utilize the individual muscles and describes the extent to which the man moves his foot, thus walking by the natural bending of knee and ankle.

Difference in Time.

In reply to our observation that he and his son and namesake resembled each other greatly, old Bill Silvers said: "The main difference 'twixt me an' young Bill is, when I put in a day at work I don't feel much like runnin' 'round at nights; and when young Bill puts in a night runnin' 'round he don't feel much like workin' next day."—*Topeka Capital*.

They Will Fight Man.

It is said that in England the weasels sometimes hunt in little packs consisting of a dozen or more; and that there are well authenticated cases of their having resented the interference of man, promptly attacking the latter, and absolutely placing him in danger of his life, says the *American Forestry Magazine*, Washington, D. C.

Don't Read When Drowsy.

To read or study when tired or drowsy is to strain the eyes to a dangerous degree, writes W. M. Carhart in *Public Health*. Avoid evening study whenever possible. If you are using your eyes by artificial light, be sure the light does not shine directly into the eyes, and try to have it come from behind and to the left side so as to avoid the harmful glare.

Waterproof Socks.

If shoes are much worn in the damp without overbores the soles should be waterproofed. Most shoe dealers carry a preparation for the purpose, or a two-to-one mixture of melted vasolin tallow and rosin may be applied at home. You will find that the shoes do not only defy water after such treatment, but wear longer.

Debs will be free next. First it was Mrs. O'Hare, then the three German editors of Philadelphia who did all they could to obstruct every war cause. How can Mr. Wilson expect a patriotic people to condone such acts?

Warren G. Harding is not the kind of man to go out and say a lot of things which he cannot make good. Neither is he the kind of man who will play to the galleries for votes. He will not be so easily elected as some of the other aspirants. But once elected we will have a president who will fill every need.

It is well to remember that any piece of fireworks is dangerous in the hands of children. The so-called "harmless" sparkler numbers scores among its victims. The first death has occurred in Philadelphia. Let there be none here. Thirty-seven children of Philadelphia have met death in the last seventeen years from the sparkler.

The part Pennsylvania played in the nomination of Warren G. Harding was no small one although Senator Harding would have been nominated without the help of Pennsylvania had our state chosen to stay off the rapidly filling band wagon. When it came to Pennsylvania's turn to vote, Senator Harding needed only a few votes to put him over the line. Pennsylvania seized the opportunity to give the final shot and voted sixty for him.

Those little "pygmies," as the Journal styled them a few weeks ago, came through clean as a whistle. The Journal told us that they would get lost in the shuffle and have a hard time explaining their voting when they returned. It seems we are living in a new political era which is so far in advance of the Journal that it cannot believe that honor has become a part of the game. Boal and Gillette were elected on a Sproul-Wood platform, Sproul first and Wood second. They stuck loyally to Sproul from the first to the tenth ballot and did not desert the Keystone ship until they were released by Governor Sproul, when in line with their pledge, they cast their votes for General Wood. Boal and Gillette made good on their pledges to the people of this district.

The statement has often been made that the Eighteenth Amendment has taken liquor out of politics and that candidates and parties should no longer be expected to pledge themselves on the liquor issue. It is a matter of great importance when so wise a man as Senator Knox gives his opinion and in a few words Senator Knox has issued a warning to temperance people that they should immediately heed. Here is what he says and every line of it is true:

"The Supreme Court by its decision upholding the Federal Prohibition Amendment and the Volstead Enforcement Act, has made the liquor question an everlasting political issue, in the opinion of Senator Knox, who was passing through Philadelphia on his way to New York.

"The court's ruling," he said "makes it a legislative issue, and hence it will be up to each Congress to determine what is and what is not an intoxicant. In other words, if Congress is 'wet' the whole country can be wide open."

Take Wives' Surnames.

In some parts of Scotland the fish women very frequently call themselves by their wives' surnames. Thus James Smith marries Mary Green. He calls himself even in business affairs, "James Smith Green."

The 20 Per Cent Deduction Is Still In Full Swing at Lytle Bros.

Today we enter on the fifth week of this tremendous sale. It has been a good thing for the people of Clearfield and vicinity and they have proven that they appreciated our efforts. We are going to continue it all this week. You can come in and choose freely from our big stock of shoes and hosiery (nothing reserved), and take

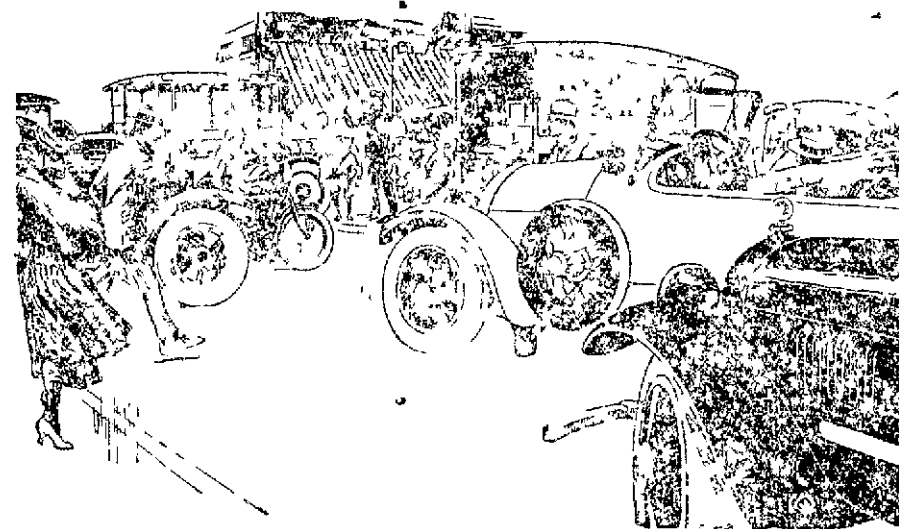

One-Fifth Off The Regular Price

This means that for every \$5.00 you spend here we give you back \$1.00. This is the only store in Clearfield that is making this offer. It means shoes and hosiery at lower prices than they can be bought elsewhere. You get the same quality merchandise you always were able to get at this store and the 20 per cent off the regular price makes them less than you would pay for inferior grades.

You also have the benefit of having your feet fitted by experienced shoe fitters.

Come in this week if you can.

LYTLE BROTHERS

Here is Thoroughbred Fuel

If gasoline could be identified by a pedigree—Atlantic would have a long list of quality points. But it is known by its performance, its economy, its vigor and life and action. Atlantic is the high speed fuel that makes rubber spin the road.

There's no in Atlantic—stand, ready go, that keeps the engine full of power which keeps flowing while you keep your foot down. Every drop of Atlantic makes energy because it all burns. It vaporizes fast, so you need only a half ounce—more of it and little fuel.

Atlantic is a gas cleanly. It doesn't foul spark plug nor the engine. It is so clean that you can see it in the air. It has no fear of a hard, cold, or hot day when Atlantic is used.

Once your car has been adjusted for the season, you can forget it with Atlantic because it has the range that compensates for weather changes and atmospheric conditions.

Yes, sir, Atlantic is thoroughbred gasoline and it's used by the known motorists and truck-owners. They've found out by experience that the place to get the right fuel for gasoline motors is the Red Pump where the Atlantic sign says

WITH THE COUNTY AGENT

Last fall most of the farmers of Clearfield county sold their wheat for \$2.00 per bushel and were glad to find sale for it at that price. The following figures prove that the farmers at least are not profiteering.

The following figures represent the average of forty-four farms in twelve different counties scattered over the entire state. The information was kept accurately throughout the year by the farmers on especially made blanks for that purpose. The records were then forwarded to the College where they were calculated and averaged. They represent cost on eight hundred six and one-half acres ranging from four to forty-four and one-half acres per farm.

In making these calculations a number of definite values for factors entering into the cost were used. Seed wheat was charged at \$2.50 per bushel. Manure \$2.00 per ton, charging only 50 per cent. to wheat. Fertilizer was charged at its actual cost, like-wise lime that was applied. Interest was charged at 5 per cent. on only that part of the land, equipment and buildings that was devoted exclusively to the wheat crop. The depreciation on machinery was allowed at the farmers' own rates which in almost all cases was 10 per cent. Man labor was charged at 30 cents per hour and the horse labor at 15 cents per hour. This makes only \$6.00 per day for man and team and is somewhat under the amount that is usually necessary to pay when hiring. The yield of straw was credited at \$6.00 per ton before the cost per bushel was figured.

The following is a brief summary of the cost of producing an acre of wheat:

Man labor (27.99 hours)	\$8.46
Horse labor (45.39 hours)	6.81
Seed wheat	4.77
Manure (1.57 tons)	1.57
Fertilizer (282.2 pounds)	3.51
Lime (288.7 pounds)	.81
Depreciation of machinery	1.81
Interest in land, building and machinery	8.46
Oil	.08
Binder twine	.65
Coal, oil and gas	.27
Threshing	1.15
Taxes	1.25
Insurance	.21

Total cost per acre \$39.71
Value of straw (1783 lbs.) 5.36

Net cost per acre 34.35
Yield of wheat per acre 19.5 bu
Cost of wheat per bushel \$2.00

The average farm requires an investment of \$40.33 in building and \$20.25 in machinery and equipment for every acre of wheat grown. The average charge per bushel for threshing wheat was 5.7 cents. The average acreage of wheat per farm was 18.8 acres with an average value of \$111.00 per acre.

The following shows brief summary of the distribution of the labor required to grow an acre of wheat.

NUTRITION CLASS THRIVING: TWO GET GOLD STAR

At the Nutrition Class meeting last Thursday, the gold star for the highest gain was won in one group by Mary Bakley and in another by Josephine McLaughlin.

Miss Hurley from the State Dispensary and Mrs. Clyde Slaver assisted with the weighing and recording.

Miss Isabel McGill and Miss Madeline Hughes, from the High School Domestic Science Class, served milk cocoa to the children. The following recipe was used. You will note that it is very weak cocoa, the cocoa being mainly to color and flavor the milk and thus give the children a change from plain milk. No strong cocoa should ever be given to children.

Six Servings. Level Measures.
3 tablespoons cocoa
3 tablespoons sugar
2 cups water
4 cups milk
Pinch of salt.
Mix dry ingredients. Add boiling water and cook until smooth and glossy. Add milk and heat to scalding. Do not boil. Beat with Dover beater to make it frothy before serving.

Sulphur Clears A Pimply Skin

Apply Sulphur as Told When Your Skin Breaks Out

Any breaking out of the skin on face, neck, arms or body is overcome quickest by applying Mentho-Sulphur. The pimples seem to dry right up and go away, declares a noted skin specialist.

Nothing has ever been found to take the place of sulphur as a pimple remover. It is harmless and inexpensive. Just ask any druggist for a small jar of Mentho-Sulphur and use it like cold cream.

ERICKSON-KIRKMAN

On Saturday morning at the Lutheran parsonage, this city, by Rev. C. W. Baker, Mr. Anton E. Erickson of Munson, Pa., and Miss Martha M. Kirkman, of Grassflat, Pa., were united in marriage. Only the immediate families were present. The beautiful and impressive ring service of the Lutheran Church was observed. The happy couple will be at home in their newly furnished home in Philipsburg after July first. Their many friends unite in wishing them a very happy and extended married life.

CAMPED AT PRAIRIE ROCKS

The party that camped at the Prairie Rocks Camp last week saw one large doe and two fawns a day old. They also saw many pheasants and snappers. They caught about four hundred fish and also visited many of the camps and places of interest on the mountain.

The party consisted of Mr. and Mrs. A. E. Carr and two children, of Johnstown; Mr. and Mrs. C. C. Richner and three children, of Cresson; Mr. Herbert Keeney, of Johnstown; Jess Justice of Cresson and Mr. and Mrs. E. P. Carr and four children, of Clearfield.

1b Backachy Or Kidneys Bother

Eat less Meat and take a glass of Salts to flush out kidneys—Drink plenty water

Uric acid in meat excites the kidneys, they become overworked; get sluggish, ache and feel like lumps of lead. The urine becomes cloudy; the bladder is irritated, and you may be obliged to seek relief two or three times during the night. When the kidneys clog you must help them flush off the body's urinous waste or you'll be a real sick person shortly. At first you feel a dull misery in the kidney region you suffer from backache, sick headache, dizziness, stomach gets sour, tongue coated and you feel rheumatic twinges when the weather is bad.

Eat less meat, drink lots of water; also get from any pharmacist four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean clogged kidneys and stimulate them to normal activity, also to neutralize the acids in urine, so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive, cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active. Druggists here say they sell lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.

"If you want to know whether you are destined to be a success or not, you can easily find out. The test is simple and infallible---Are you able to save money? If not, drop out. You will lose. You may think not, but you will lose as sure as fate, for the seed of success is not in you."

James J. Hills, the Great Upbuilder of the Northwest, is credited with the above.

Observation has taught that to become successful a person must first learn how to save, and second, how to invest those savings. All successful men find it advisable to protect themselves and their families by making conservative investments from their earnings.

Do you do this?

Business men, farmers, professional men, merchants, wage earners, women as well as men, should be a part of and should invest carefully and conservatively in, other business other than their own—preferably in home industries.

Penn Public is offering to its customers, either for cash or on a special savings ten monthly payment plan, its 7 per cent. Cumulative Preferred Stock.

This stock represents a safe and well-secured investment in a home enterprise.

In a business which supplies a commodity, vital and essential to the everyday life of you and your neighbors.

It may seem this is an unusual plan for a company to adopt for marketing its securities. That is true. It is done, however, to increase the interest and co-operation of Customers and employees by a distribution of partnership interests here in the community which Penn Public serves.

In these advertisements reference has been made only to the sale of this stock to Customers. A sufficient amount has been reserved, however, to permit each and every employee, whether a Customer or not to subscribe.

We propose to encourage and assist each employee to invest in this stock.

This should at least be convincing proof to others of our honesty of purpose and faith in our statements as to the safety and security of this stock as an investment.

Plastic Amputations.

Dr. G. Bosch Ayres of Buenos Ayres has made a remarkable success in modeling the stump of an amputated thigh by the plastic operation. In the *Semana Medica* (Buenos Ayres) he gives details of the way he remodels the stump so as to utilize the individual muscles and describes the extent to which the man moves his foot, thus walking by the natural bending of knee and ankle.

Difference in Time.

In reply to our observation that he and his son and namesake resembled each other greatly, old Bill Silvers said: "The main difference 'twixt me and young Bill is, when I put in a day at work I don't feel much like running 'round at night; and when young Bill puts in a night running 'round he don't feel much like working' next day."—*Topeka Capital*.

They Will Fight Man.

It is said that in England the weasels sometimes hunt in little packs consisting of a dozen or more; and that there are well authenticated cases of their having resented the interference of man, promptly attacking the latter, and absolutely placing him in danger of his life, says the *American Forestry Magazine*, Washington, D. C.

Don't Read When Drowsy.

To read or study when tired or drowsy is to strain the eyes to a dangerous degree, writes W. M. Carhart in *Public Health*. Avoid evening study whenever possible. If you are using your eyes by artificial light, be sure the light does not shine directly into the eyes, and try to have it come from behind and to the left side so as to avoid the harmful glare.

Waterproof Soles.

If shoes are much worn in the damp without oversoles the soles should be waterproofed. Most shoe dealers carry a preparation for the purpose, or a two-to-one mixture of melted gutta serena and rosin may be applied at home. You will find that the soles do not only defy water after such treatment, but wear longer.

Attention Mine Foremen

"Ovalhole" Rod Packing for pumps, engines, etc., is constructed on an entirely new principle. It is also sold on a new principle, namely by the foot not by the pound. It is lighter and therefore less expensive than other packings. Try a piece on your mean piston rod or valve stem and we will give you back your money if it is not the best you have ever used.

Foley's Honey and Tar COMPOUND

STOPS THAT DISTRESSING COUGH—checks it quickly and surely, clears the throat of phlegm and mucus, and cures the raw, inflamed surfaces with a healing, soothing medicine.

Don't Cough Until Weak

"I am an old lady, 75 years old, and I had a very bad cough from having the grippe. I thought it a good time to try Foley's Honey and Tar Compound, and I sent and got a bottle, and it stopped my cough, and I got better. So now I am around the house again."

—Mrs. Mary Kirby, Spokane, Wash.

We can prove no imitation or substitute is as good as the genuine Foley's Honey and Tar.

Overheard on the street

Said the Girl---

"Jack that Palm Beach suit you got at Mirkin's makes you look as cool as the proverbial cucumber. And when you stop to think that you paid only \$18 for it the comfort you're getting out of it is worth twice that."

Said the Boy---

"Yes I was undecided for a while—I thought the way prices run that I couldn't get much for \$18 or \$20 or \$22 but the minute I saw these suits I knew I was going to get one—it is a matter of being fitted and a color selection."
